ACTIVITIES

Arts & Crafts - Trash to Treasure

We use recycled materials such as toilet paper rolls, bottle caps, pipe cleaners and cardboard and we made owls, crabs, airplanes, robots and trains.

This is so fun!

ACTIVITIES

STEM - Oil Spill Experiment

We tested different materials, such as paper towels, sponges, spoons and cotton pads, to find out which was the most effective. Through this experiment, we learned how different materials absorb and remove oil in different ways.

Let me try this method.

ACTIVITIES

Stick 'Em - Soccer Challenge

We became robot engineers and soccer players! We built a robot that could push and pass a ball. Through teamwork, creativity and problem solving, we improved our designs and celebrated every goal we scored!

EVENTS

Easter Egg Hunt

We had so much fun on our sticker hunt! We searched high and low for stickers and every time we collected five, we got to exchange them for a yummy chocolate Easter egg. It was so exciting to see how many we could find!

EVENTS

Market Day

After weeks of preparation, we were finally able to sell our products at Market Day! It was so exciting to welcome customers, use our selling skills and see all our hard work pay off.

MARKET DAY

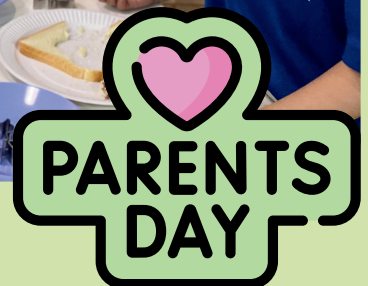

EVENTS

Parents' Day

Parents' Day was a fun and special day! We created a family portrait to celebrate our loved ones and made delicious Nutella bread with colourful sprinkles. It was a wonderful time making memories together with our families.
